## Types of Votes: Comparative Summary 1989 to 2005

Early voting figures (by post and in person), while issued separately, have been aggregated as Early Votes in the graph below. This has been done to provide for easier comparison with reports of previous elections.

There was a consistent increase in the number of early votes recorded in 2005. This could be due in part, to a growing awareness of the availability of early voting.

The increase of 236 provisional votes may be related to the changes that were made to the electoral boundaries in 2003.
